

SnaPi™

powered by Pay by Pi

*patent pending

What is SnaPi™?

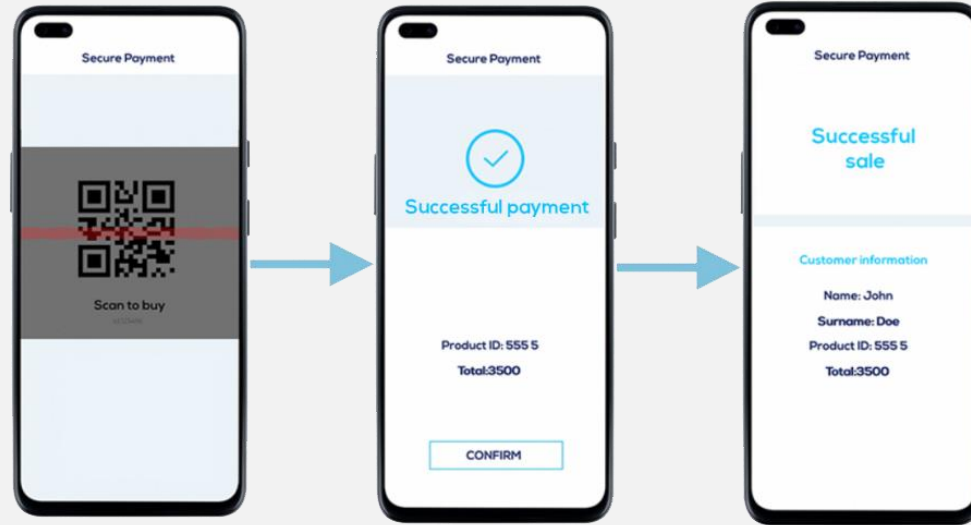

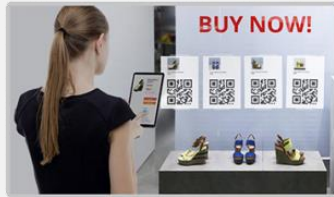

SnaPi™ is a new shopping method that makes it possible to get through shopping in a snap.

SnaPi™ is based on **Pay by Pi** service, which enables users to make payments in a few seconds using QR codes. This service is PCI DSS certified.

SnaPi™

Technology Partnership

SnaPi™ may be used for:

Online shopping

Scan the QR code directly from the seller's site and shop easily online

In-store shopping

Scan the QR code from a price tag of the item

Window shopping

Scan the QR code from shop windows, billboards, magazines, posters, etc. and get your items shipped to your address!

1 The user selects the item they want to buy.

2

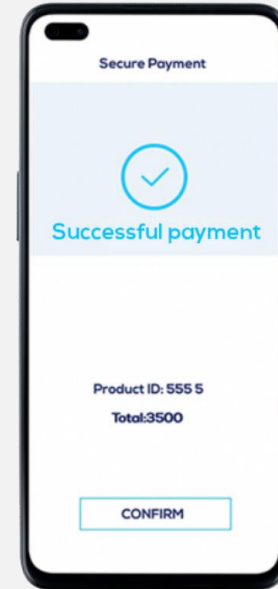

The user scans the QR code of the item they selected.

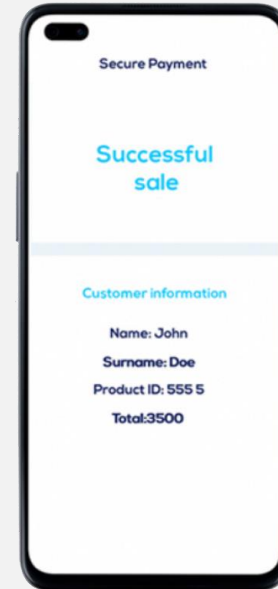

3

The payment process is done.

4

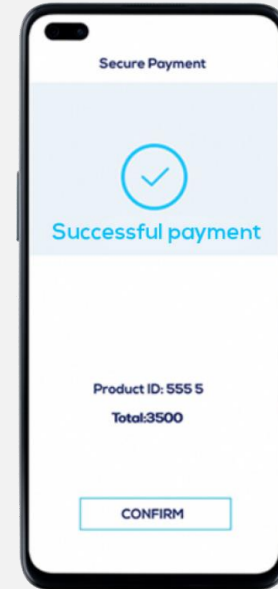

The seller receives a confirmation of the completed transaction and all the information necessary for the shipping of the item.

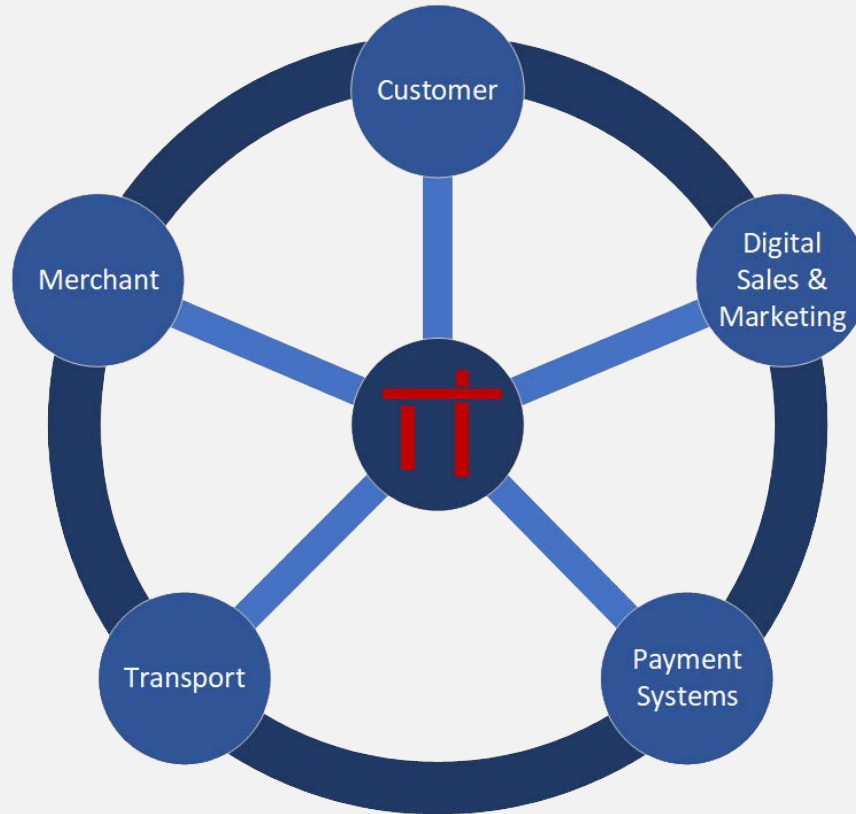

5

The user receives a confirmation of the completed transaction.

SnaPi™ technology

What is PCI DSS and why is it important?

The PCI DSS (Payment Card Industry Data Security Standard) is designed to provide a framework for security processes around sensitive data management, namely storing, processing or transmitting cardholder info.

*You **cannot** handle credit card details, if you are not PCI DSS compliant.*

Technology Partnership is **the only** Serbian company that possesses PCI DSS certificate with its own technology.
