Verified by **Pi** STAY AT HOME

The Verified by Pi®: STAY AT HOME platform monitors any established quarantine geo-localisation and identity data.

The Verified by Pi®: STAY AT HOME portal for Authorities provides an easy way to determine the location and radius of movement for all persons under restriction. Any movement outside the zone would alert the authorities.
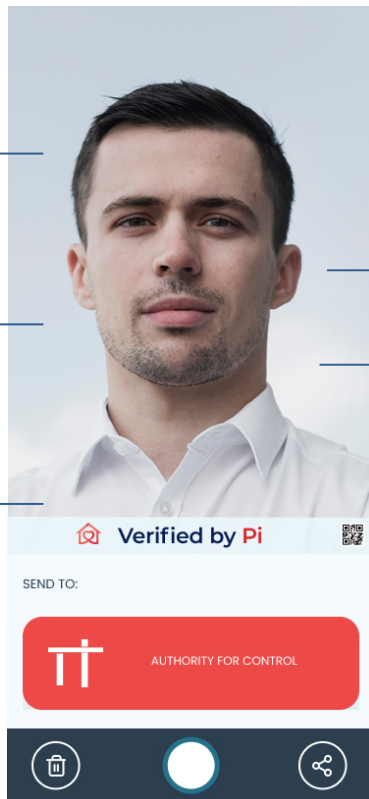

The Verified by Pi®: STAY AT HOME platform will also provide a secure channel for communication between members of the public and public services to make it more efficient and less time consuming, freeing additional human resources.

STAY AT HOME
COVID - 19
