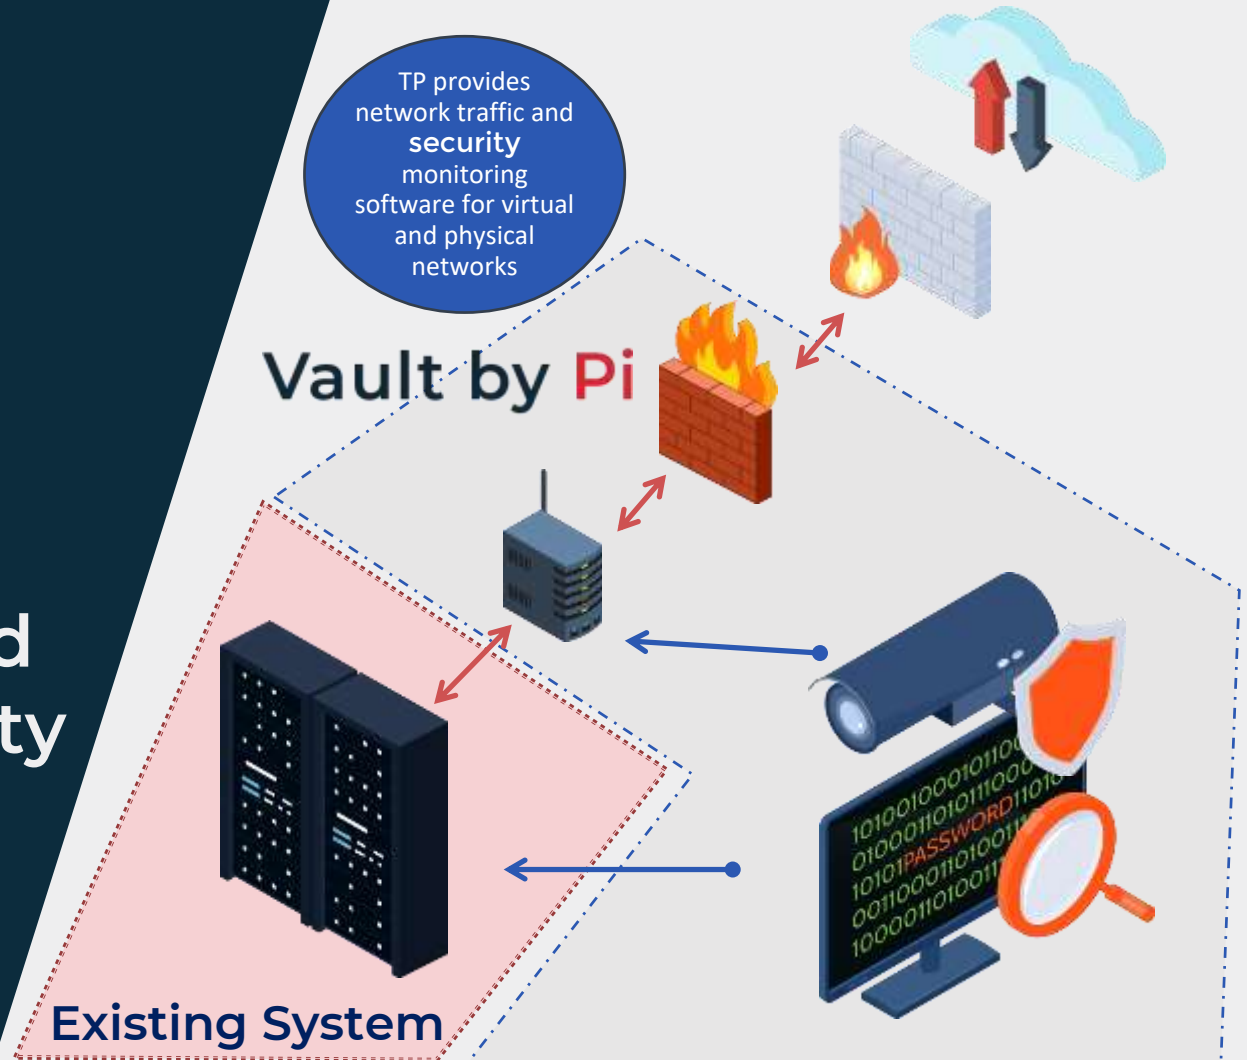
To Protect Integrity and Confidentiality



GDPR
General Data Protection Regulation

Principles of Data Protection

- Private data
- Lawfulness, fairness and transparency
- Purpose limitation
- Data minimisation
- Accuracy
- Storage limitation
- Integrity and confidentiality

GDPR
General Data Protection Regulation

Consulting

- Consulting
- Analyse, justify and clean stored customers' data
- Maintain an information security policy
- Maintain a vulnerability management program

Clean Data Advantage

- GDPR and Email Marketing: An Opportunity for Growth
- Consumer Trust
- Worldwide Compliance

PCI DSS Standard and why is it so important?

The PCI DSS (Payment Card Industry Data Security Standard) standard is designed to provide a framework for the security processes around sensitive data management, namely storing, processing or transmitting cardholder info.

*You **can't** handle credit card details, if you are not PCI DSS compliant.*

Technology Partnership is **the only** Serbian company that possesses PCI DSS certificate with its own technology.
